- 3) Cylinder Serial # _____ Color: _____ AA / AL
[] Visual Inspection [] Hydrostatic [] Oxygen Clean [] Tumble [] Valve Service

- 4) Cylinder Serial # _____ Color: _____ AA / AL
[] Visual Inspection [] Hydrostatic [] Oxygen Clean [] Tumble [] Valve Service

To ensure the safety of all who may come in contact with SCUBA cylinders, we conduct the most precise, technically detailed and Federally compliant visual inspection of high pressure cylinders in the industry today. We use the respected and recognized PSI-PCI, Inc. 18 Step Protocol and insist on accurate assessment of your cylinder to these high standards for both your safety and those around you. When a cylinder fails our comprehensive evaluation, you may be certain that a significant potentially dangerous condition has been identified. We will show you both the problem and the documents that guided our decision.

Our cylinder inspector is formally trained and is certified to perform the vital visual cylinder inspection. He/she cannot knowingly allow a cylinder having damage exceeding the allowable limits to remain in service. Therefore, you are hereby informed that should your cylinder fail our formal and documented visual safety inspection, it will be condemned. After required codes and threads have been obliterated, as a conspicuous disabling measure, the cylinder and valve will be returned to you.

To Visual Cylinder Inspector:

I, _____, owner of high pressure cylinder(s) identified above, have requested your visual inspection and/or hydro test service. I understand that these vital safety examinations are needed at prescribed intervals to ensure the cylinder is safe for filling and continued service. I have been informed that various damaging factors may cause my cylinder to fail either assessment.

I agree, as a condition of having either service performed on my cylinder, that the cylinder may be conspicuously disabled if it does not meet the accepted standards of quality and I receive a written report which identifies the reason for failure. Also, I will have the disabled cylinder and all components returned to me.
